Product information:

The VEXO206 is a high-output 2.5-way loudspeaker, providing a powerful and detailed signature sound of the VEXO family with a dual 6.5-inch driver in a compact cabinet.

The combination of the elegant enclosure and high performance allows them to be used in installation applications that require both a modern look and a unique audio experience from nightclubs to sports facilities. Compression driver overload protection is provided through an internal limiting circuit. Mounting in both horizontal and vertical directions is possible with the included wall bracket. The VEXO206 offers two mounting positions within its bracket: close to the wall for a compact appearance, or slightly offset for a more refined and elegant floating effect.

An optional 70/100V transformer module can be installed to use VEXO206 in Hi-Z systems. The VEXO206 loudspeaker is available in Black (B) or White (W).
